<b>Completion</b> 2012	<b>Construction costs</b> 68 M€
<b>Surface area</b> 42,000 m <sup>2</sup>	<b>Location</b> Noyal-Pontivy

# Centre Bretagne General Hospital, Pontivy, France

Set in a copse on the Kerio site at Noyal-Pontivy, the new medical centre with its horizontal design blends harmoniously with the rolling countryside. Its architecture is segmented, providing many and varied views of the landscape; a central road serves the building, distributes services and provides a link with the planted internal

patios with their colourful and soothing ambiance. This is the first hospital receiving a subsidy from Europe's "Heating Fund" (Fonds Chaleur) for its wood-fired heating plant that covers 80% of its heating needs and sources its requirements from local industries.
