lodges, 3 500 VIP
seats, 2 000
«Family» seats, 2
200 «Premium»
seats)

Construction costs

53 M€

Location

Saint-Étienne

Restructuring of the Geoffroy Guichard Stadium

The Legendary Geoffroy Guichard Stadium: “A Futuristic Operation That Surpasses The Legend”

- project in line with UEFA EURO 2016 standards (40,000 seats, 41 boxes, 3,500 VIP seats, 2,000 “family” seats in the presidential stand, 2,200 “premium” seats in the opposite stand),
- open angles (tiers) to maintain the view of the stadium’s emblematic gables through a wind-breaking climatic skin,
- the project highlights the historic tiers of the supporters’

stand + upper walkway

- an ideal layout for performances, with public access via the 4 historic entrances and the construction of a new mega-structure for staged performances,
- total remodelling of the presidential stand with three superimposed panoramic VIP boxes and terrace opposite the pitch, raised presidential box, press level with panoramic views, etc.
