2002

**Completion**  
2006

**Surface area**  
45,000 m<sup>2</sup>

**Construction costs**  
69 M€

**Location**  
Grenoble

The aim of the new “Minatec Hub” is to link teaching and research, and industrial development around 4 facilities: an INPG and CIME teaching centre, a CEA (LETI), INPG, CNRS and UJF (Joseph Fourier University) research centre, an industrial development centre, and the Maison des Micro et Nanotechnologies (MMNT). The chosen

location of this new building is in a highly privileged situation, which not only respects the functional and technical requirements but also showcases Minalogic’s role as a competitiveness cluster. Furthermore, these buildings are complete with clean rooms, a conference room and a business incubator.
