THE NETWORKED HOSPITAL

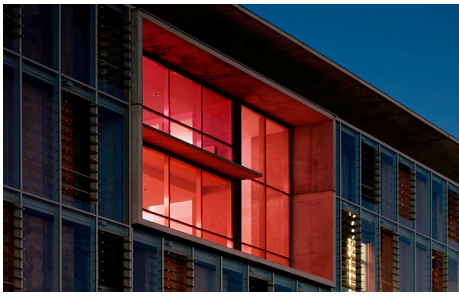

Arras General Hospital is a project that sets the standards for a new generation of hospitals combining rational design and a high-quality environment :

- a «networked hospital» where logistical organisation is based on new information and communication technologies (NICT) ;
- a «smart hospital» using a double-skin façade system for passive solar heat gains and natural ventilation ;
- « the hospital as a place to live », with fantastic views of the gardens, patios and pools, and a reversal of the traditional room layout to optimise the relationship between medical staff and patients.

Client : Centre Hospitalier d'Arras | **Type of project :** Redevelopment of Arras General Hospital | **Selection method :** Public commission | **Team :** Groupe-6 (lead consultant, architect and quantity surveyor) - Jacobs France (engineering) | **Competition :** 2002 | **Delivery :** 2007 | **Net surface area :** 70,890 m² | **Number of beds :** 644 | **Construction costs :** € 108.5 M excl. VAT (2009 value)
