TRANSCENDING COMPLEXITY

Set on a sloping, narrow, highly constrained plot, the new emergency unit at Créteil Hospital presents a tightly controlled design with simple volumes and a range of different scales, levels of transparency and views over the hillsides of the Marne. Preserving the existing circulations of the hospital, which consists of a series of pavilions with a number of extensions, the new facility rises to the challenge of building on an occupied site to improve the operation of the hospital complex and to redistribute the entire site by providing shared visitor access points, patient access points, and logistical connexions.

Client: Centre Hospitalier Intercommunal de Créteil | **Type of project:** Construction of a central emergency platform on the Hospital Centre site | **Selection method:** Public commission | **Team:** Groupe-6 (lead consultant, architect and quantity surveyor) - CET (engineering) | **Competition:** 2009 | **Delivery:** 2013 | **Net surface area:** 11,030 sqm | **Construction costs:** € 20.6 M excl. VAT (2009 value)
