Bocage University Hospital

groupe-6

Dijon, France / 2013

DELIVERING FRESH ARCHITECTURAL AND LANDSCAPE COHERENCE

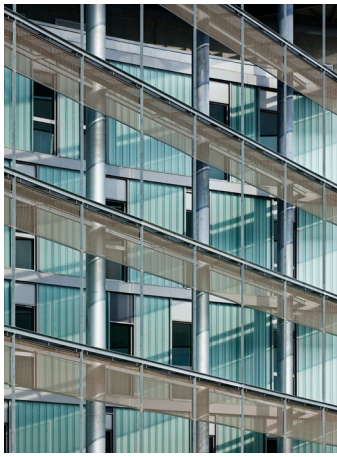

Intended to group the activities of Dijon University Hospital Centre on the very limited Bocage site, the construction of 79,000 m2 of theatre and clinical support blocks and accommodation is linked to the transformation of the existing «Bocage 62» building housing surgeries and day clinics.

The 90,000 m2 New Bocage Hospital is set on the edge of the protected park, and links the buildings in a way that lends fresh coherence to the architecture in harmony with the landscape.
With a total of 777 beds divided between four units clustered around a theatre and clinical support block, it comprises three parallel wings connected by glazed walkways. A deep base punctuated by patios houses the theatre and clinical support block (upper and lower ground floor). The accommodation blocks are split over four levels and arranged by speciality, linked to each level of the main Bocage building by a glazed gallery providing views of the courtyards and patios.

Client: Centre Hospitalier Universitaire de Dijon | **Type of project:** Construction of Bocage central University Hospital | **Selection method:** Public commission | **Team:** Groupe-6 (lead consultant, architect and quantity surveyor) - Egis Bâtiment Grand Est (engineering) - Echologos (acoustics) | **Competition:** 2002 | **Delivery:** 2010 and 2013 | **Net surface area:** 87,195 m² | **Number of beds:** 770 | **Construction costs:** € 175.4 M excl. VAT (2005 value)
