REENGAGING WITH THE TOWN

In order to restore clarity and unity to the whole hospital site, the redevelopment and extension of Roanne General Hospital opted for a simple and efficient architectural style with a strong identity, thereby re-engaging with the town. The site is redesigned along two main axes, East to West and North to South, thus clearly linking the new health centre to its home town and to the Loire, its river. With a horizontal layout, emphasised by the lines of the slabs and overhangs in the North-West façade, it presents a human face. The colourful cladding of the linear complex makes the different functional levels easily identifiable from outside, and adds to the comfort of the treatment areas near the access zones.

Client : Centre Hospitalier de Roanne | **Type of project :** Redevelopment and extension of the main Roanne General Hospital site (including radiotherapy and nursing training building) | **Selection method :** Public commission | **Team :** Groupe-6 (lead consultant, architect) - E2CA Ingénierie (quantity surveyor) - Iosis Rhône-Alpes (engineering) | **Competition :** 2003 | **Delivery :** 2009 and 2013 | **Net surface area :** 46,294 sqm | **Number of beds :** 230 | **Construction costs :** € 92.8 M excl. VAT (2009 value)
