A STRONG IDENTITY IN HARMONY WITH THE LANDSCAPE

The General Hospital (CHAL), located in a rural setting, is a compact, horizontal, four-storey structure which opens onto gardens and blends into the surrounding landscape.

The CHAL complex, with a North East-South West orientation, comprises two separate units: a hospital with over 400 beds, an 8-room theatre block and an emergency room ; and a residential block, including a day care centre and 37 housing units for staff and occasional use by visiting families.
The expressive façades of the hospital, clad with mineral board (theatre and clinical support block) or with wood and glazed frames alternating in a random, woven pattern, help users to find their way around and give the hospital a strong identity.
CHAL is designed to be a flexible, adaptable building with scope to extend it by 14,000 m² net surface area.

Client : SAS Hanvol (Eiffage Group) | **Type of project :** Construction of a hospital in Contamine-sur-Arve | **Selection method :** Public-private partnership (PPP), in the form of an emphyteutic lease for hospitals (BEH) | **Team :** Eiffage Construction Rhône-Alpes (lead consultant) - Groupe-6 (architect) - Forclum - Eiffage Travaux Publics | **Competition :** 2006 | **Delivery :** 2011 | **Net surface area :** 53,964 m² | **Number of beds :** 457 | **Construction costs :** € 134.6 M excl. VAT (2009 value)
